Get inspired with Red the Robot®

As Red's popularity has continues to grow, this month we wanted to share some Red the Robot® good practice from other teachers with you.

"...we've used **Red the Robot® in role play** situations, create a home and a rocket ship and writing stories around the robot's exciting experiences..."

"...I downloaded the **resources from the website** to create a 'get up and go' whole class or small group activity with the cards. Children have to move to the right answers..."

"...some of my **unmotivated boys loved using Red the Robot®** in a small group as they felt it was their special resource..."

"...we used **Red the Robot® in DT sessions**, making junk model robots! The children loved decorating their robots and they enjoyed discussing how to make them..."

"...we created a simple **speaking and listening** game with the star counters from the website. A child had to make the noise or sound or word and the others had to guess by putting the counter on the answer..."

"...I left a Red in the **reading corner with headphones** and a couple of books. Children would independently listen to stories and then make up their own..."

"...We created Star reader pouches that children took home with the **phonic letters** for the day. They have really bonded with Red the Robot®! ..."

"...we decorated the box that Red lives in. Children learned how to **respect resources** and they felt that Red belonged to the class and not to the teacher..."

"...I used Red as a **child initiated device** with suitable Phase cards. Children enjoyed independently reinforcing their sounds work with Red..."

"...We love Red the Robot! We think every school should have one!..."

How do you use Red the Robot®? Send in your ideas for get other teachers inspired!

Send your ideas to becky@redtherobot.com

Thank you for the teachers who gave their ideas. Other ideas can be found on our website www.redtherobot.com
